

# IP ADVANCED RADIO SYSTEM

## APPLICATION EXAMPLES < Restaurant >

Cover the floor with seamless and efficient communication.

### Sharing the Wireless Access Point

The wireless access points can be used both as a public wireless hotspot access service and for the IP advanced radio system.

### Group Communication

The IP communication terminals can communicate with groups and all members in the system, as well as with an individual.

### Full-duplex Communication

The IP communication terminals can talk and listen at the same time like a telephone\*.

\*Either the HM-153LS, HM-166LS or HS-85 with OPC-2144 is required.

### Short Data Messaging

The IP communication terminals can receive Short Data Messages with a vibration alert from a PC installed IP100FS.

### IP100FS Remote Communicator

When the IP100FS remote communicator is installed in a Windows PC, it allows you to communicate with IP communication terminals like a dispatch console.
