

IC-7760

Time Capsule Version

Messages to future Icom employees, at the 100th Anniversary in 2064

This time capsule was installed at the commemoration of Icom's 60th Anniversary.

The IC-7760 HF amateur transceiver, the commemorative model that was produced in 2024, was chosen as the time capsule vassal.

The time capsule contains messages and items relating to the 60th Anniversary event, from current Icom employees to future Icom employees.

This time capsule will be opened in 2064, at the 100th anniversary in 40 years' time.

We hope these messages of our thoughts, dreams and hopes, will be conveyed to future Icom employees.

Contents
